DETAILED ACTION

Response to Amendment

1. The examiner has withdrawn the objection to the abstract since it has been corrected as advised in the previous office action.
2. The examiner has withdrawn the objection to original claim 98 since it has been corrected as advised in the previous office action.

Allowable Subject Matter

3. Claims 1-29, 31-84, 86-104 are allowed.

The following is an examiner's statement of reasons for allowance:

The allowability resides in the overall structure of the device as recited in independent claims 1, 32, 44, 86, 92 and 96 and at least in part because the claims now incorporate the language "the portable device being in the range of between 160 and 195 degrees when the portable device is disposed in the recess". It is noted that while Fig 6. of Yin et al. shows a display of a device mounted in the range claimed, the additional detailed limitations of the stand with anchor, base, and support as claimed are not met by Yin et al. While Ruch et al. teaches the stand as claimed with the base, anchor and support, the device in the stand cannot be mounted as claimed. The combination of the stand of Ruch et al. with the device as mounted in the stand of Yin et al. would not be obvious as the device could not be mounted in such a manner in the stand of Ruch et al.

The aforementioned limitations in combination with all remaining limitations of claims 1, 32, 44, 86, 92, and 96 are believed to render said claims 1, 32, 44, 86, 92, and 96 and all claims dependent therefrom patentable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
